

Printing from iPad

Part One: On iPad

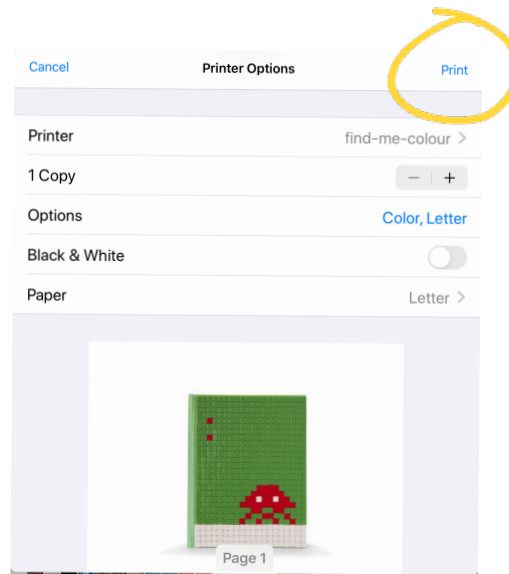

Each app has a different pathway to print. In general, look for these symbols or words like **share** or **export**.

You will then choose black and white or colour. Then you will log in using your email user name (without @sd22.bc.ca) and your password. The iPad will remember you credentials.

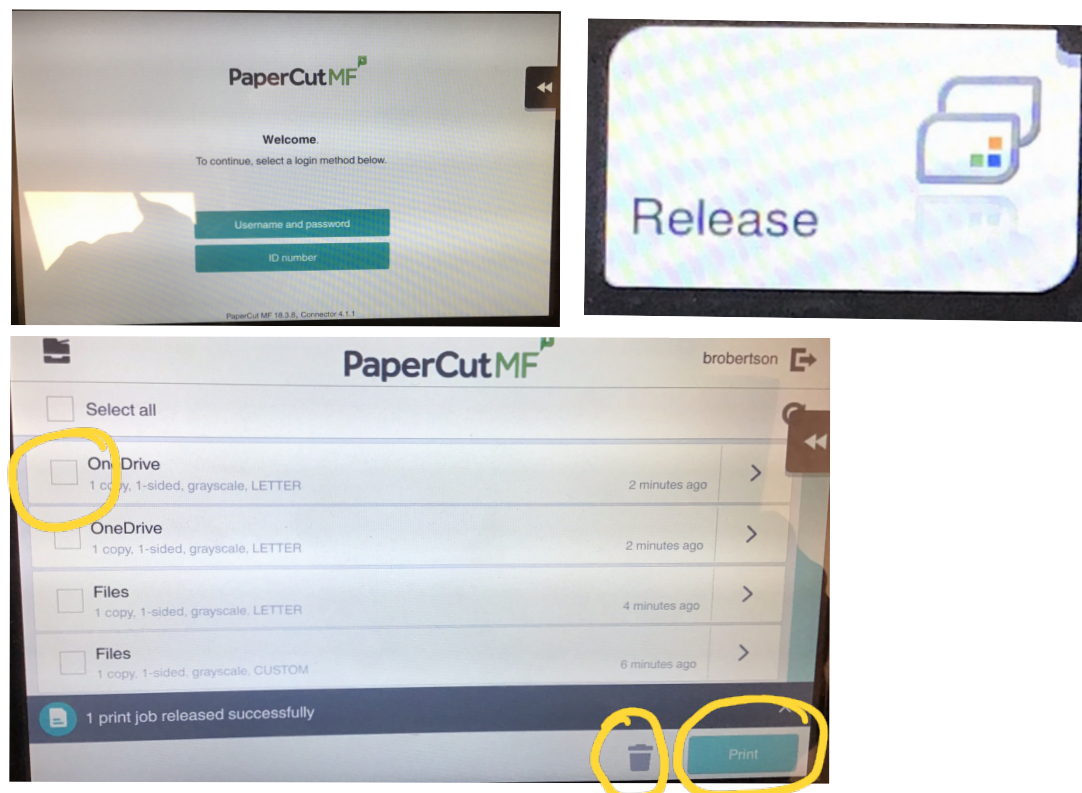

Choose your options.

Part One: On Photocopier

Log in to PaperCut using as above or use ID number (employee number) or if logged in press **Release**.

Select items to print and press **print** button. You can also delete items from print list.
