

Set-up a School District iTunes Account

An iPad used in an educational setting should not be logged into a personal iTunes account. These devices are set-up for teacher use and you should create an iTunes account with your appropriate school district email. When asked for a payment method do not attach to a credit card and select 'None'. This type of account will allow you to add free Apps to your school district iPad but any Apps that cost would need to be purchased through the technology department. When the applications are purchased this way we can bulk purchase them at half the price. In addition, by purchasing through the technology department we then have the flexibility of being able to transfer Apps from one device to another.
